

Final Project Considerations

Recording, Engineering, and Mixing

1. Your final project is due, in its final form, on Friday, January 29, at the end of the period.
2. Prior to (or on) the 29th, I need to see your REAPER file to verify that you have the correct number of tracks and have met the minimum requirements for the audio part of the project. (See the Final Project Introduction and Guidelines for details.)
3. The work you give me on the 29th needs to be put together in such a way that I could present your work even if you and your group were all absent. Here are some things to think about:
 - a. Your audio should be rendered to an .mp3 or a .wav file
 - b. PowerPoint presentations should be set up with timings and include the audio file
 - c. Movies should be rendered to a DVD, CD, or thumbdrive
 - d. Any files too big to e-mail (more than 2-3 MB) should be copied onto a DVD, CD, or thumbdrive
 - e. Test your file transfers BEFORE Friday the 29th so you can make sure that you'll be able to give me your work by the end of the period
