

Note for 3/10/11
Recording, Engineering, and Mixing

I'm not here this morning! I'll be back around 10:15 or so and I have a couple of quick things that I'll show you in the lab. In the meantime:

I've put a copy of my mixed version of "Captain Captain" on CVStuShare. (It's called "captain.mp3".) Feel free to listen to this or pull it in to your Reaper project file so you can compare my mix to yours. FYI, I mixed this song using only the techniques that you already know or will learn for this project, so technically it should be possible for you to duplicate my mix exactly ...

I've also posted a document called "Using Reverb and Delay as Send Effects". This is what we'll go over in class on Friday and next week. Feel free to give it your best shot – Sammy and Aden can help you out if you get stuck, and I'll show everyone how to use these effects as well.

Have fun and I'll see you at 10:15.
