

Warm-Up: AML's

On a half-sheet of paper, answer the following questions (5 mins, 5 pts)

1. What is a ^{non-microscopic} macroinvertebrate? ^{with no spine}
2. Give two examples of macroinvertebrates.
3. Give an example of an aquatic macroinvertebrate.

→ SNAIL -+
• KRILL
• JELLYFISH
• CUTTLEFISH

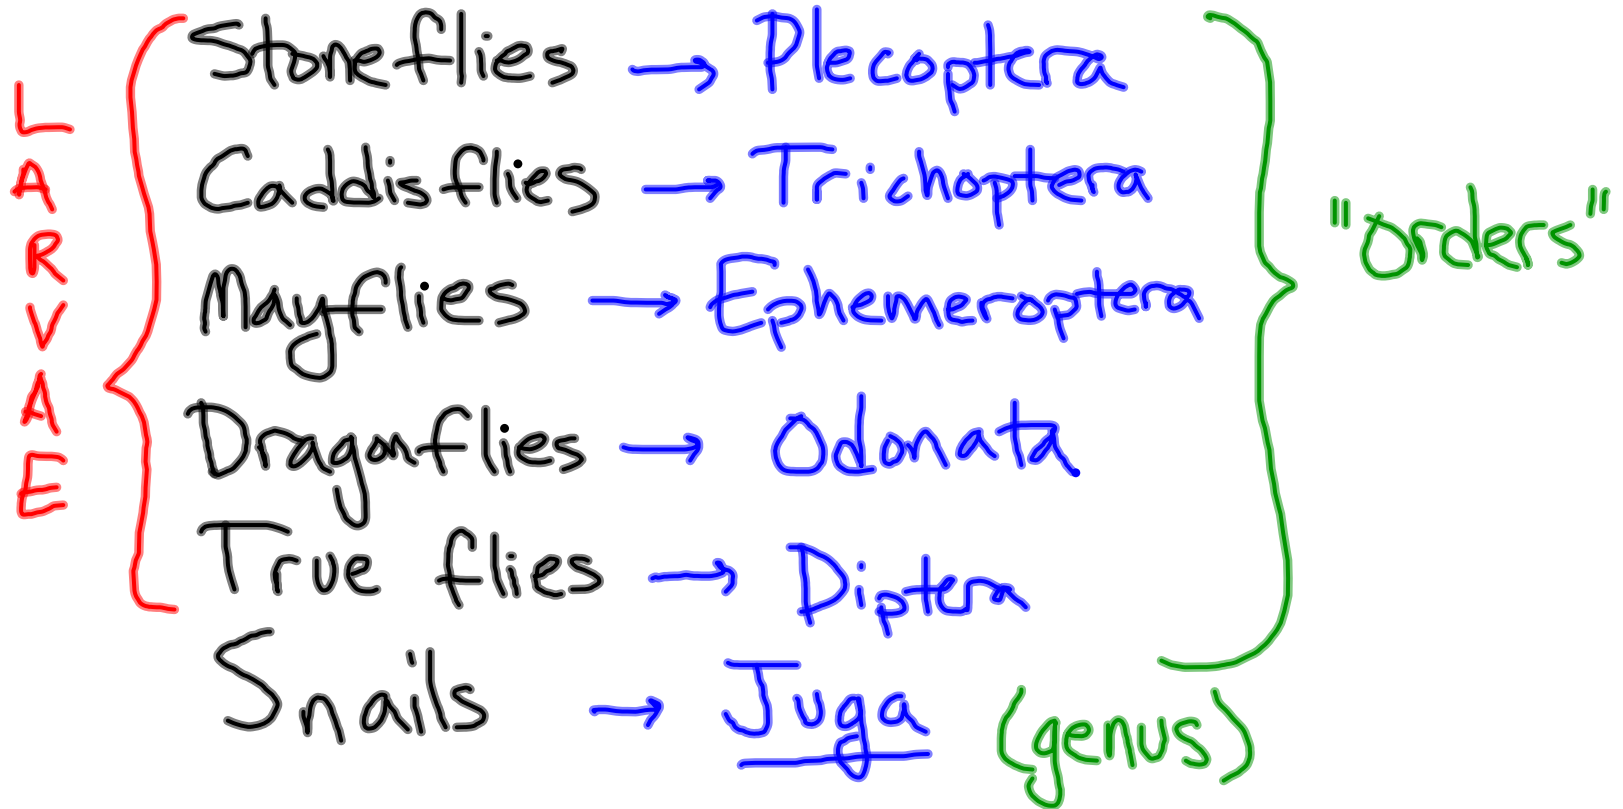

• NAUTILUS
WORMS -+
SILVERFISH

• LEECH

• MAYFLY

→ have to live in water

Freshwater Aquatic Macroinvertebrates

Today:

Draw a detailed picture of each type of macroinvertebrate in your portfolio

- Have an instructor verify your AMI before you draw

- Finish the last drawing of an organism
- Place all organisms in a single bucket
- Put string in garbage; bricks on the cart in back
- Turn off / unplug microscopes
- Wipe down lab tables and microscopes
- Drop off your portfolios in the turkey bin
- No one leaves until your area has been checked off
