

### Tips and Reminders:

- Collect DO, turbidity, and AMI's from the same location (in that order, preferably).
- Work carefully; if you make a mistake, start over! We'd rather have less data than poor data.
- Try to gather information from 3-4 sites.
- Work in groups of 3 or 4; each of you should collect a water sample for both DO and turbidity.

name: \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_

location: \_\_\_\_\_

## Data sheets:

- One per location (you can fit one or two on one side of a sheet of paper).
- One set of data sheets per group.
- Everyone should have this in their notes.
- Turn your group sheet in at the end of the period!
