

# Analyzing Noyes property data:

1. Identify the variables in your study
2. Reorganize so that your variables appear as separate columns in Excel
3. Rework your data again
  - simplify
  - calculations (averages & totals)
  - directly address your question
4. Make a graph

WITRB:

pres/abs of him BB  $\frac{1}{2}$

measuring unit 1

# of other plants present?

measuring unit 2
