

Challenge #1

Recording, Engineering, and Mixing

Create your own song!

Use MIDI loops or audio loops (see the link from the REM web page) to make a song. You can also use your headphones as a microphone to record your own sounds – these sounds can be played back directly in REAPER or you can play them as an instrument by using the Samplomatic5000.

Play your song at the end of the period for Mr. Bregar to get credit for this assignment.
