

A+ CAD Hints:

- Use the coordinate system to keep yourself organized
- Type coordinates $(0,0)$ to specify starting and ending points (don't use the mouse!)
- Use the "@" symbol to specify relative distances (distances from wherever you currently are) + means up or right. - means down or left
- Use "e-snap" to make sure your lines match up perfectly

When printing select:

"center on page" - advanced

"monochrome" - advanced

"landscape" - print setup
