

# Cell Model and Poster

## *Biology*

**Assignment:** You will create a thematic cell model and poster depicting either a plant or an animal cell. The poster should explain each structure in your model and how that structure is analogous to a cellular structure. The completed model and poster should be self-explanatory – no additional information should be needed to explain how your model is analogous to a cell. You may make your poster in Google Sheets or use a piece of posterboard.

**Grading:** Your peers and your instructor will evaluate your model; the scores will be combined for an overall score.

### **The Model (10 points):**

- includes all cellular structures on the “Cell Model Ideas” assignment
- all analogies are appropriate to the theme
- is neatly and carefully made
- is a creative product (i.e., it is not something that was purchased)

### **The Poster (10 points):**

- correctly explains all the structural analogies
- is neatly and carefully made
- includes both partner’s names
- indicates clearly which model it refers to
