

9/13/10

The following are four Apprenticeship Opportunities in PST this year. Each of these opportunities will consist of a week outside of school working at each specific site. These are great opportunities to find out what is out there after high school.

1. Laborer's Training Center (Adair)

concrete work

mason tending

pipe fusion and pipe laying

torch cutting

forklift & small equipment operation

2. Blazer Industries (in Stayton -- they make homes)

computer drafting

engineering

framing

masonry

welding

metal fabrication

HVAC

plumbing

electricians

3. Community Services Consortium Weatherization

trains you to alter houses to save energy
makes homes more sustainable
weatherization

4. Electrician's Training Center (Tangent)

conduit bending
solar energy panels
low & high voltage circuits
electrical training

There is an optional informational meeting about these opportunities and how to get selected for them on Wednesday, 9/15/10 at the Harding Center (College Hill) on the corner of 31st and Harrison Blvd; 7:00 PM. Interested parents and students are encouraged to attend.

Today:

- If you brought safety glasses today, when we get started come see Mr. K so we can engrave them and then lock them up.
- Get with your partner and finish RITW.
- Turn in today:
 - A piece of paper with both your names, calculations, and data from your trials.
- If you get done with your trials, come see Mr. H or Mr. K and we will let you into the computer lab
- EVERYONE will complete the write-up in the computer lab.
