

# CV Arboretum Quick Map Assignment

## *Field Ecology*

Our arboretum was designed, built, and maintained by CV students and volunteers. The goal of the arboretum is to provide an environment for learning and recreation that focuses on native plants and landscapes.

The arboretum is located by the large greenhouse, the indoor practice facility for baseball, and the student parking lot.

Make a sketch of the arboretum. Include the following features in your sketch:

1. A diagram showing the location of each tree and shrub.
2. The common and scientific names of the plants (you only need to write these out in full once; for future references you may use abbreviations such as "Ga. Oa." for Garry Oak.
3. The path through the arboretum, the large greenhouse, and the indoor practice facility.
4. The general location of weeds and weed-free areas. (Identify the general type of weed if possible; for example, "thistles" or "grass".)
