

Challenge #1
Recording, Engineering, and Mixing

Create your own song!

Use MIDI loops or audio loops (see the links from the REM web page) to make a song. You can also use your headphones as a microphone to record your own sounds – these sounds can be played back directly in REAPER or you can play them as an instrument by using the SampleMatic5000. We will look at how to do this next week.

Play your song through REAPER at the end of the period on Friday, September 24th, for Mr. Heilman to get credit for this assignment.
