

Lichen study :

What is the relationship between
the pollution tolerance rating of lichens
measurement 1st factor
and distance from
measurement 2nd factor highland ?

Data Collection:

Lichen	Length	% Length ÷ TOTAL	Tolerance	Adjusted tolerance (% × tolerance)
Ramalina f.	total cm of lichen	decimal between 0 and 1	1	<div> number from 0 to 5 ↓ </div>
Ramalina m.	" " " "	↓	4	
Usnea	↓	↓	3	
Evernia	↓	↓	1	
Parmelia	↓	↓	1	
Hypogymnia	↓	↓	1	
Loxoria	↓	↓	5	<div> ↓ </div>
TOTAL	TOTAL	(add to 1)	total →	<div> From 0 → 5 TOLERANCE RATING </div>

- Find small sticks
- Have LOTS of lichens
- Look for diversity
