

Tips for paper models:

- Use all (most) of your paper

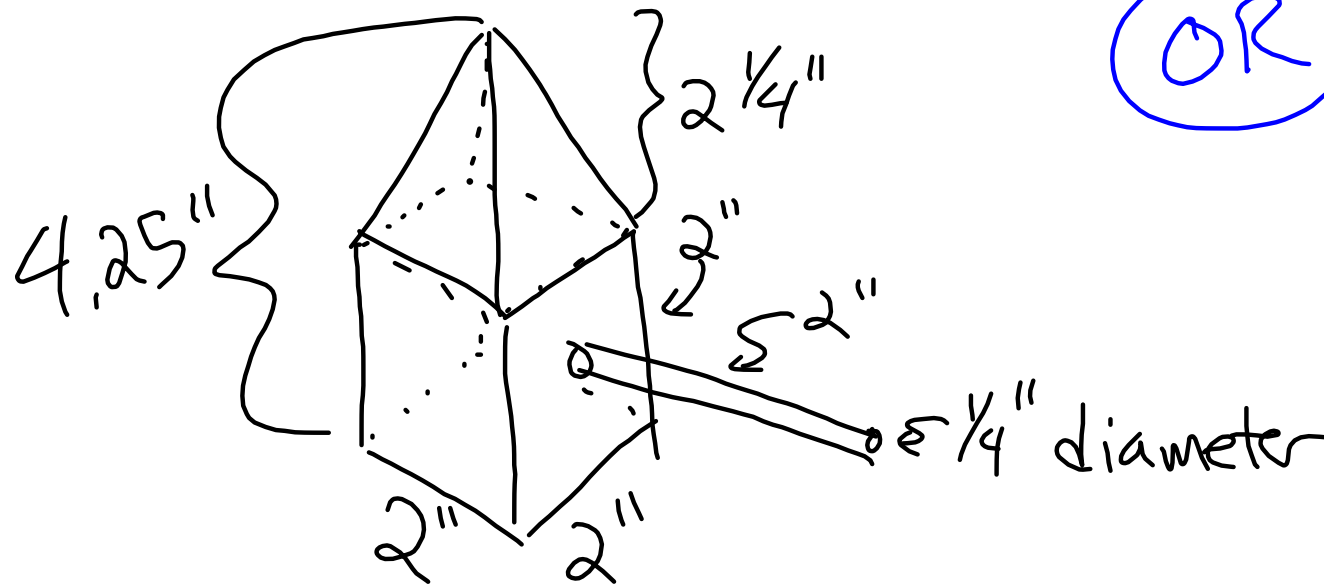

- Leave a place for the fan (2-4" per side)
- Shapes should connect at edges only (no overlaps)

After your paper is done and approved:

1. Measure & write the horizontal and vertical measurements
 - Round to nearest $\frac{1}{4}$ "
 - Write measurements on a drawings
2. From your measurements, build a model in SolidWorks
