Diptera

Odonata

Jug

- Find as many different
orgs as you can
- Identify them & sketch

- Pick up brick in a large-ish container with tether
- Detach tether - rinse in back sink & stretch out to dry
- Remove & throw away twine
- Rinse brick set on side counter to dry
- Swish leaves in creek water (used leaves go in a blue bin)
- Visual search - use pipette to move orgs into a petri dish
- Dump used water in a blue bin & swish another round of leaves
