Check Pinnacle for missing/incomplete work

Always check the website FIRST if you're absent

Remember: *Effort* and *thoughtfulness* are what count

1. A moose is pushing a derby racer North on a trail in the woods. He goes a total of 1100 meters in a straight line, and it takes him 63 seconds. What is his velocity? (Use the Five Steps.)

2. A squid hits a derby racer floating in the ocean with one of its tentacles. The derby racer goes straight down 251 meters in 28.3 seconds. What is its velocity? (Use the Five Steps.)
