

Genetics Vocabulary

1. On a separate sheet of paper write down a correct definition and a definition in your own words for all the terms below. You may use any resources around you (the internet, your books, etc.)
2. Once you have finished writing the correct definitions for the terms below find an article that uses at least 5 of the vocabulary words in the article. Write 2 to 3 sentences about the article and then write down the source of the article (internet address, magazine title, journal title, etc.).
