SURFACE AREA CALCULATIONS

- A measurement of the plastic you used for your structure (cm^2)

- On average - 15,000 - 25,000 cm^2

You're going to calculate the area of each of the shapes on your A+CAD layout drawing (use the layout drawing you and your partner used for your structure)

Area of square/
rectangle : length \times width
Area of triangle : $0.5 \times \text{base} \times \text{height}$
Area of circle : $3.14 \times \text{radius} \times \text{radius}$
radius = diameter $\div 2$
