

Warm-up: Genoplasty

1. What is the definition of genoplasty?
2. Is genoplasty a theoretical idea (model) or is it something that can actually be observed? Explain your answer.
3. Do you believe that genoplasty occurs?

GENOPLASTY: When the gene frequency of a gene in a population changes

Genoplasty is something that can be observed - but its importance lies in its application to our biological models.

Class vote: 100% - genoplasty occurs
there is no such thing as genoplasty
EVOLUTION: A change in gene frequencies
over time
