

Reaper "protocol":

- Copy Reaper + project files from CVstushare to USB drive
(ONCE per project)
- Copy Reaper + project files from USB drive to desktop
(ONCE per day)
- Run Reaper from DESKTOP!
(Do your work; save to desktop)
- At the end of the period, copy Reaper + project files back to USB drive
- ★ **BACKUP** - from Reaper, "Save as" to your H: drive.

Making music with Reaper:

• 2 easy techniques

1. Download "audio loops"

- Save in a folder on your desktop → "project folder"
- In an empty Reaper window, drag the loop in.

2. Use "virtual instrument"

- Got to use "ASIO" drivers
- Insert "virtual keyboard" & set to "receive all input"
- Set up a track with a virtual instrument
- Click on "monitor" button on the track
- Want to save it - press "Record"
