

PST 6/2/17 INSTRUCTIONS FOR TODAY:

1. Finish the assignment from yesterday in the computer lab.
2. Turn in a screen shot of your graph, and your calculations into the INBOX. If these are on separate pieces of paper, staple them together.
3. Go to the shop. Adapt your air cart to accept one of the fans.
 - Your cart must move on the track with the fan attached.
 - The fan must not fall off your cart. You must have some means of connecting the fan to your cart.
 - **Your cart must be ready by the end of Tuesday.**
4. If you get Step #3 done . . . refine your design. The cart that always manages to keep moving forward during competition will win. Shoot to make your cart be the winner.
