

Investigating Careers Assignment

In place of today's field trip, you are to complete the following assignment which is intended to help you learn about the four career opportunities that the class was exposed to today at LBCC. Complete your responses to all questions using full sentences, proper grammar, and Microsoft Word. Utilize the web to complete your research. Please print out and turn in what you complete at the end of the class period today. Each student is to complete this assignment. Be sure to follow all the rules associated with plagiarism!

For each of the four career areas we visited today (***Mechatronics, Welding, Machine Tool, and Drafting***), answer the following questions. When finished, you should have four sets of answers.

1. In a paragraph, please describe the career area. State what people who work in this field do. List at least five different examples of the kind of work people in this field do.
2. What type of education is required in order to go into this field? Two years of college, four years of college, an apprenticeship, etc...?
3. What types of high school classes should you take in your four years at CVHS if you wished to pursue a career in each of these fields?
4. What is a typical starting salary for persons entering each of these fields?
5. What must a person do to complete a program in each of these fields at LBCC? (Hint: go to LBCC's web site and check out the degree – if there are multiple degrees pick one – and list the classes that LBCC students must take.)
