

Momentumometer

- How can we use this device to demonstrate and think about momentum? (Transfer of momentum)
- Your goal is to make a momentumometer that works well and looks nice

- You'll start with a piece of wood
~ 8" x 10"
- You'll get 5 steel bearings &
fishing line & welding wire
- You'll use good quality materials &
you'll prepare them thoroughly
- Today: decide on a design &
start AutoCAD drawing

TODAY:

. Make eight thumbnail sketches

A+CAD:

- Full scale (8" x 10" max)
- All shapes & dimensions labeled
