Final Project Grading Notes
Recording, Engineering, and Mixing

Due FRIDAY: your final project in "Showcase" format.
- I need an electronic version of your final project.
- If your project is a video, I need a DVD, .avi, .mov, or .mpg (or another similar file type).
- If your project is a PowerPoint, I need the .ppt file, a .mp3 render of your project, and the PowerPoint file must be self-running.
- If your second creative element is not computer-based, I just need an .mp3 render of your project. You will need to provide everything else you need for the Showcase, and any set-up must be arranged prior to Tuesday.

Due FRIDAY: your final project Reaper files (will be graded on Friday).
- I need to see the original Reaper files you used for your project.
- You will be graded on how well you meet the criteria for the final project (in other words, you will be graded on your mastery of the Reaper program and accompanying mixing techniques).
- If you included rendered files in your project, I need to see the original Reaper files used to create those renders – I want to see every piece of evidence of every piece of work you did for the final project.

Tuesday: Showcase main event!
- You will get points for having your project in the Showcase.
- You will get points for evaluating other student projects.
- I will NOT include your work in the Showcase if it is inappropriate or if it is not up to our (yours and my) standards of effort and completion
