Noyes Property Methods Final
Field Biology

For your final Methods section, you need to send me the most recent versions of two files: the step-by-step methods, correctly cited and with a list of references in the proper format (Methods Checkpoint #2) and your blank data sheet (Data Sheets for Noyes Property).

To create your list of references, you can use http://www.oslis.org/APACitations/ (the APA Citation Maker).

Make sure both of these files meet ALL of the criteria set out in the listed documents.

Attach BOTH of these files to the same e-mail and send it to dan.bregar@corvallis.k12.or.us. The subject line for your e-mail should be "per. *X your name* methods final"
