9/24/10

A+CAD NOTES

- How do I tell A+CAD where to place something?
- 1. Use the mouse and click.
- 2. Absolute coordinates: just type in "#,#".
- 3. Relative coordinates: type in "@#,#". This will move relative to your first selection.
- 4. Use ESNAPS. (entity snaps)
- To place an ordinate dimension to label coordinates, go to INSERT – DIMENSION – ORDINATE menus.
